

EV333 Lab 2 Supplementary Figures

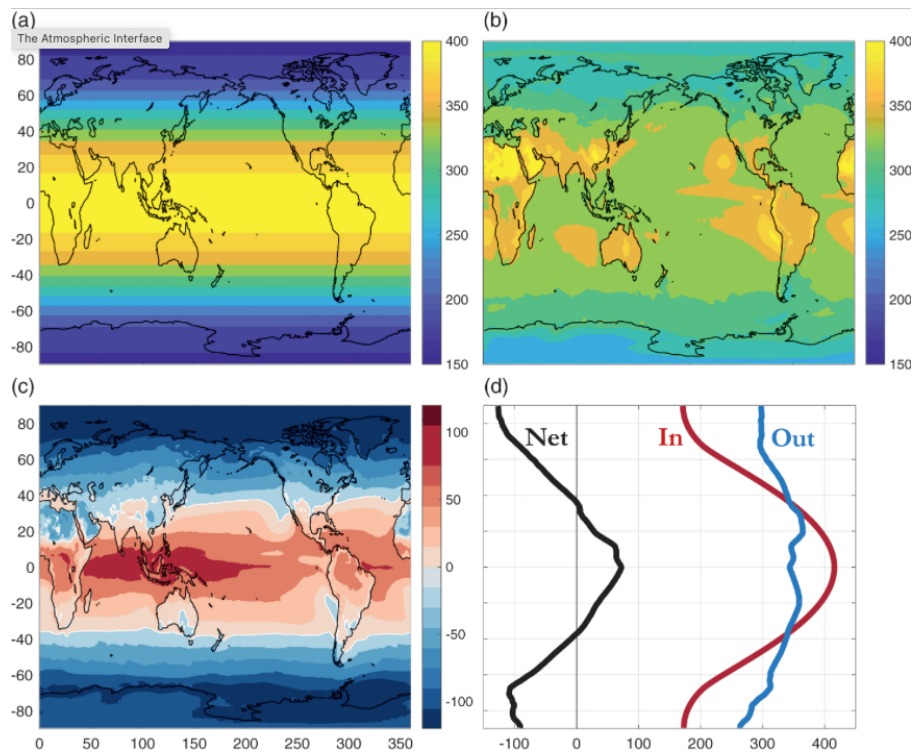

Figure 1. Long-term mean energy fluxes at the top of the atmosphere (TOA) averaged from July 2005 through June 2015 (W/m^2). (a) Incoming shortwave radiation. (b) Outgoing radiation (reflected solar and longwave). (c) Net radiation (incoming - outgoing). (d). Zonal means of incoming, outgoing and net radiation. *Figure reproduced from Physical Oceanography and Climate by Kris Karnauskas.*

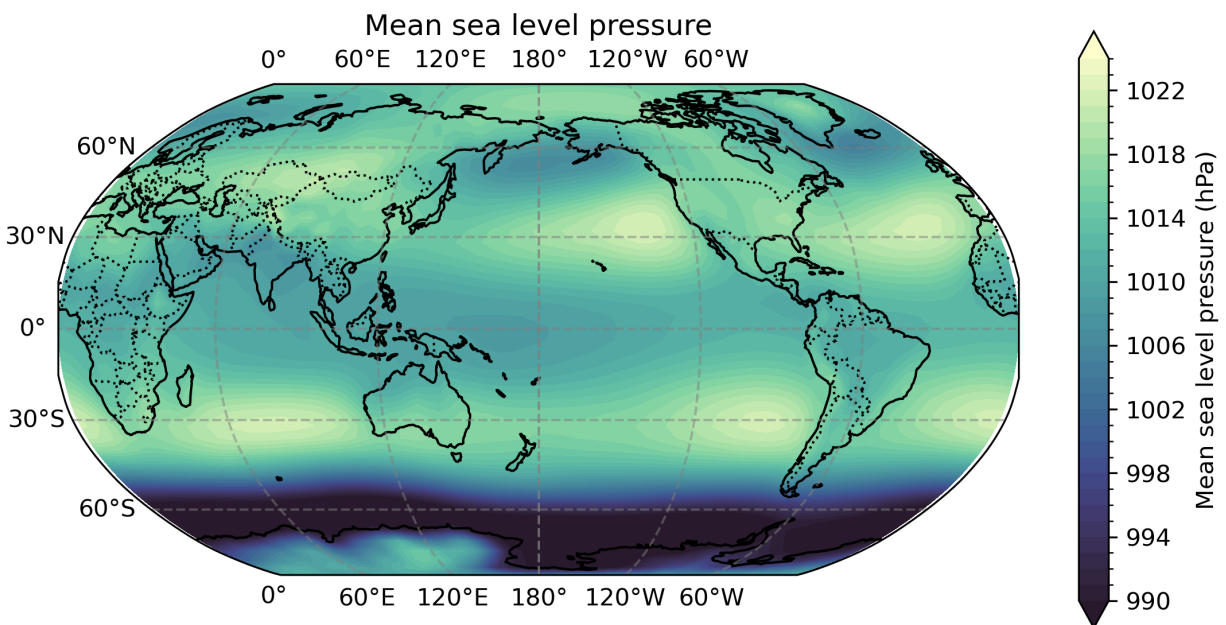

Figure 2. Annual mean sea-level pressure from July 2005 through June 2015 from the ERA5 reanalysis product. Figure generated by Professor Lawman using Python.

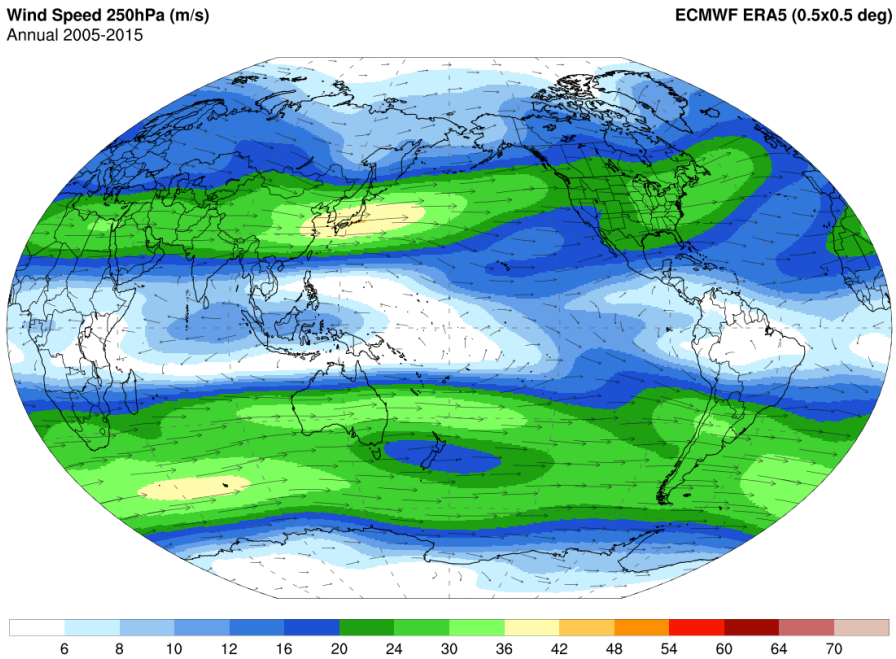

Figure 3. Annual mean 250 hPa wind speed (units: m/s) from the ERA5 atmospheric reanalysis product (2005-2015). Figure generated using the Climate Reanalyzer (https://climatereanalyzer.org/research_tools/monthly_maps/).
